Cardano Governance Survey for CC Members (past and present)

Thank you for participating in this survey. This research initiative aims to measure and improve governance on the Cardano blockchain. Your responses will help us understand governance participation, decision-making, and areas for improvement.

Resources available:

The questions in this document support the Governance Measurement Framework which assesses the health of Cardano's on-chain governance, focusing on the roles of ada Holders, DReps, Stake Pool Operators (SPOs) and the Constitutional Committee (CC).

The State of Governance Report Outline is available as a summary of the planned measurement framework data presentation, and it can be read to support understanding of the process underway.

Your responses will be reported as part of the Beyond MVG project milestone submission - All survey, interview and workshop data will be pooled together and publicly available. Please do not include any personal information in your responses.

M1-B - What type of information would most help you make governance decisions? (Select one)

- (●) Expert analysis of proposal technical implications
- ( ) Historical outcomes of similar past proposals
- ( ) Other Constitutional Committee member's assessment of proposals
- ( ) Evaluation of whether projected cost aligns with similar past proposals
- ( ) I have sufficient information to make decisions

M4/M5-B - What, if any, would most help distribute voting power more evenly across DReps? (Select one)

- ○ Better tools for discovering and comparing DReps
- ○ Incentives for delegating to smaller or newer DReps
- ○ Limits on maximum voting power per DRep
- ◉ More support for new DReps to establish themselves
- ○ Easier process to switch DReps
- ○ Encouraging ada holders to periodically review their delegation
- ○ No changes needed - current distribution is appropriate

M10-A - What would most help the Constitutional Committee respond to governance actions more efficiently? (Select one)

- ○ Clearer constitutional provisions reducing interpretation ambiguity
- ◉ Better tools for CC coordination and deliberation
- ○ Standardized proposal formats
- ○ More groups acting as CC members rather than individuals
- ○ Defined response time expectations or deadlines
- ○ Proposals with more detail for constitutional assessment
- ○ No changes needed - current CC response times are adequate

M10-B - What is an acceptable timeframe for the Constitutional Committee to review and vote on a governance action? (Select one)

- ○ Within 1 epoch (5 days)
- ○ Within 2-3 epochs (10-15 days)
- ○ Within 4-6 epochs (20-30 days) - Maximum before action expires
- ◉ Depends on the complexity of the proposal
- ○ I don't have an expectation for CC response time

M11-A - What would most help increase Constitutional Committee rationale publication? (Select one)

- ○ Clearer templates or standards for CC rationale format
- ○ Simpler tools for publishing rationales with constitutional references
- ○ Making rationale publication mandatory for all CC votes
- ◉ Financial incentives for consistent rationale publication
- ○ Community recognition for CC members who consistently publish
- ○ Clearer expectations about what rationales should contain
- ○ Clearer constitutional provisions to reference
- ○ No changes needed - current CC rationale publication is adequate

M11-B - What would most help ensure CC rationales reach and are understood by other governance stakeholders? (Select one)

- ○ Publishing rationales in multiple formats
- ○ Dedicated distribution channels to DReps and SPOs
- ○ Plain language summaries accompanying detailed rationales
- ○ Tools that notify stakeholders when new rationales are published
- ◉ Community discussion sessions following major CC decisions
- ○ No changes needed - CC rationales are sufficiently accessible

M12-A - What would most help reduce unnecessary Constitutional Committee abstentions? (Select one)

- ○ Clearer constitutional provisions reducing interpretation ambiguity
- ◉ Better conflict of interest policies with clear recusal guidelines
- ○ Improved proposal formats
- ○ Access to subject matter experts for complex proposals
- ○ Clearer community expectations for CC decision-making
- ○ Avoiding CC member running if they plan to submit a governance action that would be a conflict while serving the CC term
- ○ No changes needed - current CC abstention rates are appropriate

What improvements would you most like to see in Cardano's governance system?

Focus on quality of decicion making process is the single most important thing to get right now. This should not be a volunteer only position be it DRep, SPO or CC. How we improve the quality can be through various means such as tooling, incentives, publication / history, timing of the process (voting periods?), legitimacy (the current no incentive models does not support a high degree of legitimacy as it is quite centralizing in terms of who can and will have the time for the effort required) and the list goes on I am sure there are many other factors. Also M10-A should have had a question of compensation.

Which of these roles best describes your involvement in the Cardano ecosystem? (Select all that apply)

- [x] Ada Holder
- [ ] DRep (Delegated Representative)
- [x] SPO (Stake Pool Operator)
- [x] CC (Constitutional Committee Member)
- [x] Proposal Submitter / Project Catalyst Veteran
- [x] Developer
- [x] Researcher / Academic
- [x] General Community Member / Enthusiast
- [ ] Governance Tooling Projects
- [ ] Other Cardano Project

How long have you been actively involved in the Cardano ecosystem?

- ( ) Less than 3 months
- ( ) 3 to 6 months
- ( ) 6 to 12 months
- (•) 1 year or longer

Thank you!

Thank you for completing this survey. Your input will directly inform how we measure and improve Cardano's governance system.
